

INTRODUCTION OF LEGISLATION  
TO REAUTHORIZE THE NA-  
TIONAL EARTHQUAKE HAZARD  
REDUCTION ACT, H.R. 2249

**HON. F. JAMES SENSENBRENNER, JR.**

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, July 24, 1997*

Mr. SENSENBRENNER. Mr. Speaker, today I am introducing with my colleague on the House Science Committee, Mr. BROWN, legislation to reauthorize the National Earthquake Hazards Reduction Program [NEHRP]. Since its inception in 1977, NEHRP has contributed greatly to what we know about the science of earthquakes as well as to reducing our Nation's vulnerability to earthquakes. Earth science and seismological research performed through NEHRP has produced maps and seismic data from which we can determine seismic risks in a given location. And, NEHRP helped to develop the knowledge base that enables design and construction of new structures that are less likely to collapse during an earthquake.

The bill we are introducing today enables the program to continue its good work in earthquake research and hazards mitigation. Specifically, this legislation authorizes approximately \$105 million in fiscal year 1998 and \$107 million in fiscal year 1999 for the four NEHRP agencies, the Federal Emergency Management Agency [FEMA], the United States Geological Survey [USGS], the National Science Foundation [NSF], and the National Institute of Standards and Technology [NIST]. In addition, the bill provides \$3 million in each of fiscal years 1998 and 1999 to the USGS for operation of the Global Seismic Network [GSN].

There are several provisions of this legislation which I would like to highlight which we believe will strengthen NEHRP and provide for a more robust earthquake science and engineering research infrastructure into the next century: First, the legislation authorizes \$8 million specifically for the USGS's external grants programs. This action is consistent with the Science Committee's ongoing efforts to recognize and support external programs within the science agencies. Second, this bill requires the Director of USGS to develop a seismic hazard warning system which will enable our Nation's vital lifelines such as electric utilities, gas lines, and high-speed railroads, to receive warnings in advance of an earthquake. It is hoped that these warnings will be provided in time to shut down the lifelines, thereby guarding against the catastrophic effects that occur when such facilities are ruptured or damaged by earthquakes. Third, this NEHRP reauthorization requires an assessment of regional seismic monitoring networks to determine the state of facilities and equipment. Fourth, the bill authorizes the Director of NSF to use funds to develop earth science teaching materials and to make them available to local schools. Fifth, the legislation directs the Director of USGS to improve hazards assessments of seismic zones in the United States. Sixth, the bill requires the Director of FEMA to assess and report on disaster training capabilities and programs offered by the agency. Seventh, finally, the bill requires the Director of NSF to work with the other NEHRP agencies to develop a plan to effectively use earthquake

engineering research facilities, which includes upgrading facilities and equipment and integrating innovative testing approaches.

Mr. Speaker, the legislation Mr. BROWN and I are introducing today is reflective of the Science Committee's bipartisan efforts on behalf of Federal science and technology programs. The bill is a manifestation of a jointly shared goal to ensure that the Nation has a vital earthquake research enterprise which will continue to greatly contribute to better earthquake awareness, more widespread and effective earthquake mitigation, and ultimately, a reduction in lives and property lost from this hazard.

NATIONAL PARENTS DAY

**HON. JAY KIM**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, July 24, 1997*

Mr. KIM. Mr. Speaker, I rise today to remind my colleagues that this coming Sunday we will celebrate National Parents Day. Unfortunately, because of our busy legislative schedule, I will not be able to attend National Parents Day ceremonies in my district this weekend.

The purpose of this annual celebration is to recognize the important role that parents play in the future of our country, based on how they bring up their children. At a time when we see more families where both parents are forced to work, we need to remind ourselves that it is not the Government's role to raise our children. Nor is it a teacher's responsibility to raise our children.

Parents need to take the primary responsibility for raising their children, instilling morals and teaching those values that we want our Nation to represent in the next century. Through active participation in all facets of their children's lives, parents can mold and shape their children into the type of citizens that can lead the United States into the 21st century.

Mr. Speaker, the positive influence that parents can play in the upbringing of a child is of the utmost importance. I am pleased we take the time to celebrate this occasion, and I salute groups like the National Parents Day Coalition, for hosting events to bring this to our attention.

FAITH IN EVERY FOOTSTEP

**HON. JOHN E. ENSIGN**

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, July 24, 1997*

Mr. ENSIGN. Mr. Speaker, "Faith in Every Footstep" is the motto of the Mormon pioneer sesquicentennial year, which culminates today with a celebration of the 150th anniversary of the arrival of members of the Church of Jesus Christ of Latter-Day Saints in the Salt Lake Valley on July 24, 1847. I rise to recognize this historical milestone in the settlement of the West and important date in Nevada's early history.

Like many other western States, Nevada's initial settlements were established by Mormon pioneers—Genoa in northern Nevada in 1851, and Las Vegas in southern Nevada in 1855. In

fact, Nevada was part of the Utah Territory before becoming the Nevada Territory. The Mormon pioneers of northern Nevada were led by Orson Hyde, while the pioneer group called to settle Las Vegas were led by William Bringham. On a warm day in mid-June of 1855, these courageous pioneers began to build a diamond in the desert. The old Las Vegas Mormon Fort is the oldest standing building in the State of Nevada.

Today, amid the bustle of the fastest growing city in the Nation, beautiful chapels and a temple grace the Las Vegas Valley while serving as a place of worship for over 100,000 Latter-Day Saints. Las Vegas has become a place where Latter-Day Saints have settled to raise their families and serve their community.

On behalf of all the citizens of my congressional district and throughout Nevada, I salute those early Mormon pioneers who blazed the trails of the rugged West and built a lasting heritage for themselves and the State of Nevada.

On Pioneer Day, we should remember and honor all those brave men, women, and children who answered the call to settle new lands, and through faith, courage, and sacrifice built hundreds of settlements throughout the Western United States and made the desert bloom.

FISCAL YEAR 1998 AGRICULTURE  
APPROPRIATIONS BILL

**HON. ELIZABETH FURSE**

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Thursday, July 24, 1997*

Ms. FURSE. Mr. Speaker, yesterday, I was blocked from offering an amendment to the Agriculture appropriations bill by an unfair gag rule. This rule was written by the Republican leadership midway through debate on the Agriculture appropriations bill to change the rules for debate from an open amending process to a closed, undemocratic process.

Although we were told that no preprinting of amendments was required, the rule arbitrarily barred any amendments that weren't preprinted 2 days prior. This meant that by the time Members first heard of the new rule, it was already too late for them to meet its new restrictions. Unless, of course, you were one of the three chosen Republicans that were inexplicably grandfathered in as exceptions to the preprinting deadline.

The Agriculture Appropriations Subcommittee knew that I intended to offer this amendment. I had sent out four dear colleagues letters, including one bipartisan letter signed by six other Members. Nonetheless, I was unjustly muzzled; my opportunity to have a debate on an important policy issue was held hostage to a partisan power play.

The following paragraphs describe in detail the animal damage control amendment that I would have offered had I not been silenced by an unjust rule of the majority party.

The goal of my amendment is to reduce the Federal subsidy for a practice that many Americans believe is economically unfair, ineffective as a livestock protection method, unnecessary, inhumane, a waste of money, and harmful to the environment.

My amendment requires that those who benefit from the livestock protection services
